

M200

Automatic Armature Tester

M200 base unit and control

M200 base unit ready to test a 5hp traction motor

- Designed for OEMs (Automotive, Fork lift etc) requiring fast testing of form wound armatures
- Microprocessor controlled measurement and sequencing
- Automatic resistance measurement of windings from .1ohm to 10micro ohms
- Built-in winding temperature compensation.
- Standard base unit will hold armatures 3" to 16" in length and 2 to 6 inches in diameter. Other bases available to handle armatures to 75 lbs and diameters to 10"
- Total test time approximately 12 seconds for 2" diameter armatures to 40 seconds for 6".
